Reykjavík, November 10th 2022

Dear colleagues in the United Kingdom.

The Icelandic Nurses' Association (INA) stands beside you. You have our full solidarity during the difficult struggle that lies ahead. Your struggle is the same as ours.

Nurses do not receive wages in accordance with the workload and responsibility they have, this is a global issue. Competitive salaries and acceptable working environment in health care is vital for nurses and the quality of care.

INA urges the government authorities to negotiate immediately with RCN.

With regards

Guðbjörg Pálsdóttir

President of the Icelandic Nurses Association
